WMP SPRING AND ANDROID PROJECT

STUDENT:

Rediet Gebretsion TADESSE

PROFESSOR

Guillaume Ehret

January 2021

Spring Project

All sections that was provided as to do list was successfully worked

- Git
- Spring and dependency injection
- Spring database & JPA
- Spring rest services
- Clever cloud

controllers that work

- api/Windows (GET) send windows list
  /api/Windows (POST) add a window
  /api/Windows/{window_id} (GET) read a window
  /api/Windows/{window_id} (DELETE) delete a window
- /api/heaters (GET) send heaters list
  /api/rooms (GET) send room list
  /api/rooms (POST) add a room
  /api/rooms/{room_id} (GET) read a room
  /api/rooms/{room_id} (DELETE) delete a room and all its windows and its heaters
  /api/rooms/{room_id}/switchWindow switch the room windows (OPEN to CLOSED or inverse)
  /api/rooms/{room_id}/switchHeaters switch the room heaters (ON to OFF or inverse)

Things that doesn't work

As I am new to Spring it takes me time to finish all the parts the Building Controller isn't deployed.

Android Project

All the exercise are done.
